ANTHONY NAHUEL PASTOR DOMINGUEZ

Fullstack Software Engineer (Backend-focused)

Fullstack Software Engineer with 7+ years of experience building scalable web platforms, with a strong focus on backend development using **TypeScript, Node.js and microservices architectures**.

Experienced in developing **fintech and SaaS platforms**, designing APIs, integrating third-party services, and deploying applications in cloud environments.

Comfortable working across the entire product lifecycle — from requirements gathering and system design to implementation, deployment and monitoring.

Key strengths include backend architecture, cloud deployments and building reliable systems used by real customers.
